Cross Section Plat

This is the average end view profile of the Cross Section Plat for the length of the Bayou for the length that we are asking to clean.

We will be entering and exiting the Bayou at the Marsh Bayou Bridge on Topsy Bel Rd. There will be no other entering or exiting points of the machinery used on this project.

Also, the cross does not change much for the length of the project. This Bayou meanders through a hardwood, palmetto flat for the entire length from the Marsh Bayou Bridge to its outfall into the Calcasieu River.
